Summary

Frontend Developer with experience building responsive and functional web applications using Next.js, Tailwind CSS, and JavaScript. I turn ideas into real products by developing user-friendly interfaces, integrating APIs, and solving UI challenges. I have built and deployed real-world projects and I'm ready to contribute to a team by delivering clean, efficient, and scalable frontend solutions.

Experience

Frontend developer 2025-06-10 - 2026-02-25
Campcon (Remote)

- Built a waitlist feature where users can submit their email, with data stored in Firebase and updated in real time
- Added meta tags and improved page structure to help the site rank better on search engines
- Connected the project to a custom domain and handled deployment using Vercel
- Improved website speed by optimizing images and cleaning up unnecessary code
- Worked with team members to adjust UI and fix performance issues

Frontend developer 2024-03-20 - 2025-03-30
The QA School

- Worked with designers, backend developers, and a product manager to build a business project
- Built authentication pages (sign up, login, email verification, password reset) using React
- Connected frontend to backend APIs to handle user authentication and data flow
- Converted Figma designs into responsive and functional web pages
- Managed application state and handled API data to keep the UI in sync
- Presented the final project to management and contributed to getting it approved

Frontend developer 2025-02-08 - 2025-03-22
HNG Internship

- Built reusable UI components using React and Tailwind CSS
- Designed and implemented simple user interfaces from ideas and requirements
- Connected frontend to APIs and tested endpoints using Postman
- Worked with a team using GitHub (branches, pull requests, code reviews)
- Participated in agile sprints, daily standups, and delivered tasks on time
- Fixed bugs and improved responsiveness based on feedback
- Debugged issues and adapted quickly in a fast-paced environment

Projects

Mood Tracker Web App -

https://mood-mocha-iota.vercel.app

- Designed and built a mental wellness app for mood tracking and journaling
- Implemented user authentication and a responsive UI using Next.js and Tailwind CSS
- Connected to backend APIs to store and manage user mood data
- Added AI-generated affirmations to improve user experience
- Created a simple and personal interface for users to track their emotions

ProMart E-commerce Website -

https://promart-nu.vercel.app

- Built a full-stack e-commerce app using Next.js, TypeScript, and Tailwind CSS
- Implemented user authentication and dynamic cart functionality
- Connected to APIs for product data and checkout process
- Solved cart persistence to keep items saved across sessions
- Designed a responsive layout for smooth shopping on all devices
- Deployed the app on Vercel for fast performance

Deborah Onuegbu Brand Website -

https://deborahonuegbu.vercel.app

- Developed a responsive brand website for a client
- Translated design concepts into a clean and modern interface
- Improved user experience through intuitive layout and responsiveness
- Optimized performance across devices and screen sizes

Education

Bsc 2024-04-23

Nnamdi Azikiwe University Awka

Web Development 2024-11-25

Nnewi Tech HUb

Skills

- JavaScript • React • Node.js • next js • Tailwind CSS • TypeScript • CSS3
- MongoDB • Express.js • HTML5 • Figma • Git • GitHub
